

## DOUBLE DOOR SYSTEM

### GLOBAL EMC SYSTEM

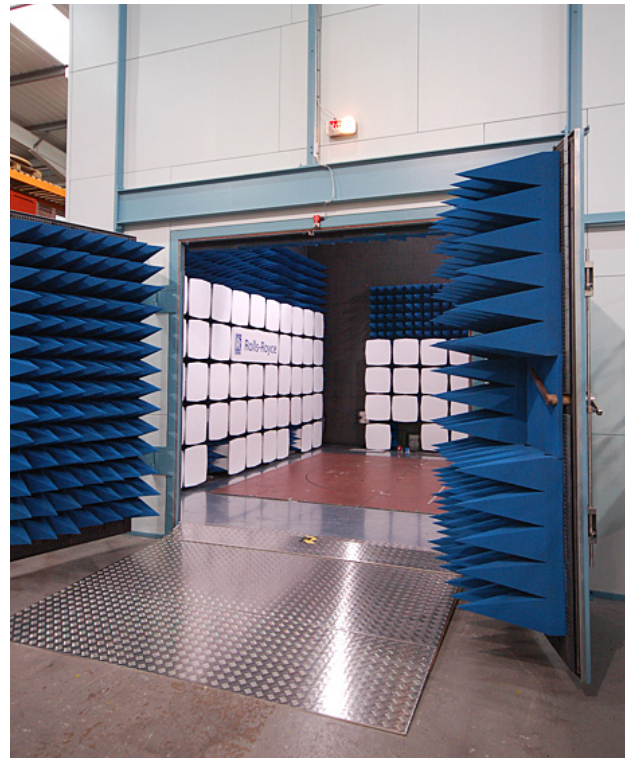

The developments incorporated into the latest Global EMC double door system are:

- » A unique Faraday encapsulation system at the door intersections causing a complete seal.
- » Special one piece door skin that forms the mating knife as one.
- » Hinges running on roller bearings for very low operating friction.
- » Door mechanisms have sleeve bearings for minimum running friction and zero maintenance.
- » Special twin stage seals for high performance broadband shielding.
- » Very easy operation see link below.

see YouTube video: <http://www.youtube.com/watch?v=Ru6E5nfyjEI>

*Double doors can have automatic or manual operation*

*Low angle 2 stage removable ramps for forklift entry are available*
